

# PRODUCT SUPPORT

Get a successful installation  
with support from qualified Mission Clay  
& NCPI representatives.

When VCP is properly installed, nothing lasts longer. Mission Clay provides vital project support for all construction with Mission VCP to ensure you get the best installation. Have a question? Need some help? Go to the Experts.

- **On Site Support** - Mission Clay Representatives are knowledgeable, with years of experience. We will be on site when you need us, from project start to final acceptance. We will assist and instruct on all Manufacturer's Recommended Best Practices for handling, storing, and installing VCP.
- **Design Support** - Mission Clay P.E.'s can provide design support for all applications of VCP, from difficult soils, to ground water, to trenchless installations.
- **Qualified Air Testers** - Mission can provide experienced air test technicians to perform final testing along with all equipment. (fee for air test service - contact local rep)

• **Mission Partners with NCPI** - The National Clay Pipe Institute works with Mission Clay to provide technical expertise AND field support on design and installation. NCPI is the leading authority on VCP and has pioneered research and testing on clay pipe for decades. NCPI can provide assistance and training on: Bedding Methods, Trench Width and Load Calculations, CLSM Slurry Backfill, Microtunneling and Jacking with VCP, Radius and Siphon layout, VCP Installation Guidelines, and a variety of other subjects, depending on your needs.

Jeff Boschert, PE  
President, NCPI
